

**WE KNOW
YOU'VE
BEEN LOOKING**

THE FUTURE IS HERE!

Now available from the trusted company SAS & Trewartha's - Solar PV! You can harness the energy of the sun to generate free electricity for your home all year round. We are a 100% independent Solar PV Installation Company. We are locally placed to Advise, Design & Install Solar PV systems.

FREQUENTLY ASKED QUESTIONS

1. What is the Feed-in Tariff scheme?

On 1st April 2010 the Government introduced the Feed-in Tariffs (FITs) to encourage new investment in low carbon green technologies such as Solar PV. The scheme requires Licensed Electricity Suppliers (FIT Licensees) to pay a generation tariff to small-scale low-carbon generators.

2. How soon will my PV system take to pay back the cost of installation?

On average 9-10 years. We expect a system to pay for itself about 5-6 times over 25 years.

3. Will I be paid for the extra electricity I generate?

Yes, all unused electricity will automatically be exported. You will also receive a payment for any electricity you don't use, that you feed back into the National Grid.

SOLAR PV

Under the Government's 'Clean Energy Cash Back' program, your energy supplier is obliged to pay for all the electricity that your S.A.S & Trewartha's solar PV system produces.

PELLET BOILERS

Relatively new to this country, Pellet Boilers are highly valued and widely used in Europe and around the world.

UNDER FLOOR HEATING

Under floor systems operate from a central heat source this being gas/oil boiler, air or ground source heat pumps, solid fuel, thermo store, solar system, or electric boiler.

SOLAR THERMAL

Our Solar Thermal systems use energy from the sun to heat your hot water for use within your home.

TRUSTED ADVICE
